Ms. Ayşen Kulakoğlu, Co-Chair of the Global Partnership for Financial Inclusion (GPFI), and Head of Department, Undersecretariat of Treasury, Turkey
Prof. Annamaria Lusardi, Academic Director, GFLEC and Chair of OECD/INFE Research Committee

17:45 – 19:00 RECEPTION
Session 1  Financial literacy and entrepreneurship: What does the evidence show?
Financial literacy is relevant for consumers as well as entrepreneurs. There is growing recognition that properly designed financial education has the potential to encourage innovation and help entrepreneurs improve their access to and use of financial services. It can also enhance their financial management practices and help scale up their business. Session 1 will discuss the available evidence at the intersection of financial literacy and entrepreneurship finance and identify key directions for future research.

Session 2  Financial literacy and entrepreneurship: What do entrepreneurs and business owners need?
The financial literacy needs of entrepreneurs and business owners are potentially wide and depend on their confidence and risk-profile, the scope and stage of development of their business, as well as the financial and economic landscape. They can typically span from understanding key financial concepts and financing options available to more sophisticated financial management skills. This session will provide an opportunity for owners and managers of small businesses from different regions to discuss their needs in terms of financial skills and how they expect financial education to support their activities.

Session 3  Financial literacy and entrepreneurship: How can we address entrepreneurs and business owners’ needs?
National policy makers, international organisations, private companies and not-for-profit entities have started to identify and address the financial education needs of owners and managers of MSMEs. This notably involves the development and delivery of financial education curricula for entrepreneurs. This session will explore the role of various stakeholders and identify good practices with a view to supporting the work of the OECD/INFE on financial literacy for Micro, Small and Medium-sized Enterprises.

Special Governors’ session  Advancing financial literacy through policy and research
Central bank governors will gather in a special session to discuss how to advance financial literacy from a policy and research perspective and the related role of Central Banks.

Wrap-up and ways forward  Harnessing financial education to spur entrepreneurship and innovation
This session will wrap up the discussions held during the Symposium, allowing participants to draw the main policy and research implications and key future direction of work.
SELECTED RESOURCES

OECD resources on financial education and financial literacy
OECD/INFE work on National Strategies for Financial Education

OECD resources on SME and entrepreneurship financing

External resources
The OECD Governments officially recognised the importance of financial literacy in 2002 with the launch of a unique and comprehensive project. In 2008 the project was further enhanced through the creation of an International Network on Financial Education (INFE). The INFE has high-level membership from over 240 public institutions - including central banks, financial regulators and supervisors, ministries of finance and ministries of education - in over 110 countries. The INFE Technical Committee meets twice a year to share country and its members’ experiences and discuss the strategic direction outputs.

The OECD INFE develops methodologies, collects cross-comparable evidence, and elaborates policy analysis and research to draw globally recognised policy instruments. It currently has 5 key policy work streams steered by expert subgroups relating to national strategies for financial education; financial education for financial inclusion; financial education for long-term savings and investments; core competencies on financial literacy; and financial education for micro, small and medium-sized enterprises. The OECD INFE is also continuing to develop and disseminate outputs from work streams and previous expert subgroups focusing on financial education for youth and for women.

The OECD INFE notably completed two series of tools to measure financial literacy and evaluate programmes that were welcomed by G20 Leaders in 2013. Based on the tools to measure financial literacy, the OECD INFE plans a cross-country survey on financial literacy and financial inclusion in 2015, which results will be released in 2016. The OECD PISA financial literacy assessment in 2012 and 2015 also allows participating countries to assess the financial literacy needs of students.

The OECD INFE is developing a global policy instrument on financial education, drawing on the existing OECD recommendations and OECD INFE principles.

The OECD International Gateway for Financial Education (www.financial-education.org) was created in 2008 to disseminate relevant research and analyses undertaken by the OECD, INFE members and other institutions. The Gateway is a global clearinghouse for financial education and awareness containing information on financial education programmes in more than 110 countries.

ABOUT GFLEC

Founded in 2011 at the George Washington University School of Business, the Global Financial Literacy Excellence Center (GFLEC) has positioned itself to be the world’s leader in financial literacy research. Rigorous scholarship, wide-reaching education, and global policy and service are at the heart of the Center's work.

GFLEC works with many partners in the U.S. and around the world. One such partnership is with the Organisation for Economic Co-operation and Development (OECD). GFLEC Director Annamaria Lusardi has also been appointed to chair the Research Committee of the OECD/International Network on Financial Education.

GFLEC builds on more than ten years of academic research by Professor Lusardi, a pioneer in the field of financial literacy. By virtue of its location in the heart of Washington, DC, the Center is uniquely positioned to inform policy and policymakers.

For more information, visit the GFLEC website at www.gflec.org.
