Financial literacy among U.S. women

The TIAA Institute-GFLEC Personal Finance Index (P-Fin Index) annually assesses financial literacy among the U.S. adult population. In addition to a robust measure of overall personal finance knowledge, it provides a nuanced analysis across eight areas in which individuals routinely function. This brief examines financial literacy among U.S. women, including variations across generations.
Women tend to have lower financial literacy than men

WOMEN 45%  MEN 55%

Most women could not correctly answer more than one-half of the P-Fin Index questions.

Wide gender gaps across areas of financial literacy

Financial literacy among women lags that of men across generations

The financial literacy gender gap is smallest among Gen Z.

Percentage point difference between women and men in P-Fin Index questions answered correctly.

BORROWING 66% 55%
SAVING 64% 53%
INSURING 49% 41%
INVESTING 54% 40%
COMPREHENDING RISK 40% 32%

Women tend to have lower financial literacy than men

On average, women correctly answered 45% of the P-Fin Index questions in 2022 compared with 55% among men.
Younger women tend to have lower financial literacy
