The TIAA Institute-GFLEC Personal Finance Index (P-Fin Index) uses 28 questions to annually assess financial literacy among the U.S. adult population. In addition to a robust measure of overall personal finance knowledge, it provides a nuanced analysis across eight areas in which individuals routinely function. This brief examines financial literacy among Hispanics, including variations across generations.
Hispanics tend to have lower financial literacy than U.S. adults in general

On average, Hispanics correctly answered 38% of the P-Fin Index questions compared with 50% among all adults.

Areas of greatest functional knowledge among Hispanics

% of P-Fin Index questions answered correctly

- **Borrowing**
  - Gen Z: 46%
  - Gen Y: 42%
  - Gen X: 49%
  - Baby boomers: 58%

- **Saving**
  - Gen Z: 42%
  - Gen Y: 42%
  - Gen X: 49%
  - Baby boomers: 54%

- **Consuming**
  - Gen Z: 44%
  - Gen Y: 41%
  - Gen X: 45%
  - Baby boomers: 47%
